He has been with the company since 1989.

Hymer Motorhomes

Always an original

For generations of holidaymakers, Hymer is the epitome of holidaying on wheels. And there is a good reason for this: Since the invention of the motorhome by Erwin Hymer in 1961, our vehicles have set standards and affect developments in this area of industry. Whatever class you are searching in: at Hymer you will always find the original.

We use this edge to offer you more – more choice, more comfort, more safety. Anyone who has been on the road in a Hymer motorhome will appreciate the difference. The thing that makes travelling a unique adventure here is the diversity of high quality details. And more than 50 years of experience that we draw upon to bring these details for you into perfect harmony.

You can gain a particularly good impression of this from the **new model year**. In the second half of this brochure you can find a detailed overview of the main equipment features, accompanied in each case by images and an explanation. This way, you can get to know the model series of your choice even better.

Of course, a description is no substitute for first-hand experience of the original. You should therefore take advantage of the opportunity at your Hymer trading partner to carefully look

around your dream vehicle and, better still, take it for a test drive. Our close-knit dealer and service network in Germany and Europe provides you with the assurance that there is always first-class support nearby.

A general overview of the Hymer model series can be seen on the next double page. Here, you can compare the

“For us, the name Hymer is a bond. And for our customers a promise. These motorhomes offer the best performance and the best quality in any vehicle category.”

basic features of our motorhomes easily and conveniently – as an initial orientation aid to determine which vehicles best match your individual requirements. Further information about all available floor layouts and equipment versions can be obtained as always

from your Hymer trading partner or www.hymer.com. You can also order the latest catalogues from there for all of the models.

If, in addition, you are among the growing number of Facebook users, we would be delighted to hear about your journeys and experiences at www.facebook.com/hymerAG. Many of

our customers contribute to this site on a regular basis and make it a lively and informative place to visit. You can find valuable tips covering the whole spectrum of holidaying on wheels with the original. Experience them yourself: the mobile homes from Hymer.

The sporty companion

Hymer Compact

In a manner of speaking, being mobile and free is the original need that helped to create camping. The new Compact from Hymer combines the advantages of the panel van extended into a motorhome with the comfort and the generosity of a semi-integrated motorhome in order to fulfil your desire for independence.

Fans of the extended panel vans mainly appreciate the manoeuvrability of the vehicle compared to larger motorhomes. As an owner, you will remain flexible and in a position to spontaneously decide what to do next thanks to its dual usability; both as a motorhome as well as a simple means of transport. The panel van has only one disadvantage: it is not a motorhome but an extended van, which is why it does not boast some of the properties that make a semi-integrated motorhome so comfortable – the living room feeling and the better insulation.

As a true Hymer, the new Compact provides exactly that: you are driving a semi-integrated motorhome complete with insulated bodywork and a GRP rear but do have to do without anything that makes the panel van so practical – from the large boot flap to the overall size that is suitable for city use.

It is the unique feeling of spaciousness that clearly distinguishes the Hymer

Compact from extended vans. This is because the Hymer Compact offers more living and storage space than extended vans. The generous headroom above the driver seats stands out as soon as you set eyes on the interior. Here, the driver's cabin section placed upon the panel van

“It was quite a challenge to accommodate the typical Hymer comfort and the sophisticated equipment into such a compact space.

However, the concept is right and will help many panel van fans to enjoy a little bit more luxury when travelling.”

Melanie Rothacher, Product Management

ensures a comfortable standing height, whereby the front seats already form part of the overall living space. Further advantages of the bodywork that was designed to be a motorhome right from the very start are the larger cupboards located above the kitchen and seating

area as well as to the right and left above the rear bed. This bed, equipped with a premium cold-foam mattress upon the slatted frame, can also be folded away in order to ensure that the huge storage space complete with loading entrance that is customary for a panel van is retained.

Thanks to a tall clothing cupboard complete with shelves, your clothes can be more carefully stored than is possible in just half-sized clothing cupboards.

More space in the wet area is also an important comfort advantage of the Hymer Compact bodywork shape. The

comparatively generous compact bathroom provides the decisive extra bit of space compared to panel vans when it comes to personal hygiene. The kitchen is equipped with a large sink unit instead just a cooker / sink combination complete with folding tap. Furthermore, a

refrigerator with a 104 litre capacity and a large freezer compartment are also standard in the Hymer Compact.

It is the comfort, as far as the seating area goes, that lifts the Compact from the panel van equipment that is usually limited to only the most necessary items.

Thanks to a fixed table complete with swivel plate, the small Hymer also integrates the passenger's seat into the group and the perceived makeshift feeling of a folding table without a swivel plate is replaced with a comfortable solidity. Furthermore, the height-adjustable seats

Ingenious combinations such as the large boot flap complete with a premium bed that can be stored to one side make the Hymer Compact a real multitasker between holidays and daily use as a result of its huge storage areas.

in the driver's cabin that are upholstered with the living room fabric are not an optional extra; they are simply part of a more sophisticated overall scheme as standard.

A panoramic roof offers new perspectives above the Hymer Compact driver's cabin. Two windows in the rear on the left and right hand sides bring light into the multi-functional motor-home and a normal body door complete with electrical step allow people to comfortably enter the vehicle without having to loudly move a cumbersome sliding door back and forth. On frosty days, the sandwich structure complete with Styrofoam insulation and GRP sandwich flooring ensure warmth and a sense of wellbeing – whereby the Compact displays much better insulating properties in cold and hot conditions compared to a panel van made of sheet metal.

Further practical properties such as a gas locker for 2x11 kg gas cylinders and the preparation for radio and TV installations as standard offer further proof of the sophistication of the Hymer Compact concept. As a result, the interior is almost entirely designed using

energy-saving LEDs and there are plenty of sockets for 3x230 Volt and 2x 12 Volt devices. The exterior of the Compact also looks impressive thanks to the striking GRP rear, the large boot flap for comfortable rear loading and the painted front spoiler. The mudflaps located on the rear axle that are not usually present on panel vans ensure that this also stays the case, even following long days of travelling.

The utmost safety is offered by the Hymer Compact with its sophisticated technology such as ESP, ASR, hillholders to ensure trouble-free hill-starting as well as driver and passenger airbags. It goes without saying that electric wing mirrors and 4 seats complete with seatbelts are also included. In order to guarantee its suitability for daily use, the external dimensions of the Hymer Compact remain clear despite the premium, homely interior fittings. With an external width of 2.10 m, a length of 5.99 m and a height of 2.75 m, it is still possible to manoeuvre easily in city centres as well as remain spontaneously mobile at home and on holiday. »

Hymer Compact – Living comfort

01 02

03

Generous living space despite compact external dimensions: Thanks to the driver's cabin section, the Hymer Compact offers more ceiling height and, as a result, also offers a generous living space that extends well into the driver's cabin. Thanks to the rotating seats, it is possible to create a cosy seating area for up to 4 people within a few seconds.

04

05

- 01 The Comfort bench with two individual seats can be easily pushed apart and is optionally available in all Compact models.
- 02 The fold-out stool can either be used as an additional seat or as a leg rest from the rotated passenger's seat.
- 03 The ergonomic entrance handle ensures an easy and safe entrance into the vehicle.
- 04 Generous living area in the Compact 404 with the warm "Trentino Pear Wood" furniture finish and the "Kalmar" fabric design.
- 05 The passenger's seat is perfectly integrated into the living space thanks to the rotating table top.

Hymer Compact – Sleeping comfort

02 03

01

04

- 01 Sleeping area in the Compact 404 with rear transverse bed and deep overhead storage lockers.
- 02 A pull-out step in order to easily get into the rear bed is located underneath the tall clothing cupboard.
- 03 View of the rear transverse bed with a 1.43 m wide lying area and a standard multi-zone cold-foam mattress.
- 04 Two large pivoted windows and the Midi-Heki above the rear bed offer the best possible air circulation, even during the night.

Hymer Compact – Washing comfort

**“The rotating washbasin
saves space and ensures maximum space
utilisation.”**

Rainer Wingart, Product Manager

02

03

04

- 01 Extra-high tap and large sink ensure the utmost comfort in the kitchen.
- 02 Making cooking fun: the standard 2-flame cooker in the Compact 404.
- 03 There is space for all kitchen utensils in the drawer complete with premium cutlery insert.
- 04 The 104-l refrigerator with separate freezer compartment is already included in all Compact models as standard.
- 05 The kitchen in the "Trentino Pear Wood" furniture finish in the Compact offers sufficient storage space for every long journey.

Hymer Compact – Storage comfort

01 02

04

03

Practical solutions combined with maximum storage space. Typical for the clever Hymer Compact. From room-high clothing cupboards with shelves to plentiful drawers, right through to the large boot flap. Every little bit of space is used in order to ensure that you have everything on board for the best days of the year.

05

06

- 01 Flexible and useful storage compartment in the base underneath the living room table.
- 02 Practical drawer underneath the bench of the Compact 404.
- 03 The pull-out step underneath the tall clothing cupboard can be opened up and also used as a storage compartment.
- 04 Easily accessible drawers and storage doors in the rear area leave nothing to be desired.
- 05 Room-high clothing cupboard with additional shelves and standard clothing cupboard light.
- 06 The spacious storage chest offers sufficient space and can also be used as practical storage space when the cover is closed.

Hymer Compact – Road safety

Everything in view, everything under control

The premium travelling comfort of the Hymer Compact also includes a range of safety equipment that is unrivalled in this class. Thanks to the best possible view in the driver's cabin and electronic safety systems, you will always remain in charge of the situation – even in critical situations.

Driver and front passenger airbag:

Both seats in the cab are equipped as standard with Fiat airbags. In the event of an accident they are triggered in a fraction of a second and prevent severe head injuries. If an airbag is triggered, the seat belt is tensioned at the same time.

Anti-skid regulation (ASR):

If traction is lost at a wheel (wheel slip), this is detected by the electronics and the wheel is braked automatically. This makes it much easier to drive off and accelerate on slippery surfaces and the vehicle is prevented from sliding sideways at the rear.

Electronic stability program (ESP):

In critical situations, skidding or breaking out of the vehicle is prevented by engine speed adjustment and by targeted braking of individual wheels. When doing this, "Adaptive ESP" takes account of the respective load status.

Traction Plus:

In conjunction with ESP, this system ensures greater traction on difficult terrain by distributing the torque to the front wheels in a targeted manner. This makes it easier to drive-off on wet grass, for example, or manoeuvre over muddy ground.

Hill holder:

On gradients of about 5% and steeper, this drive-off assistant maintains the brake pressure briefly after the brake pedal has been released. In this way, rolling back of the vehicle is prevented and comfortable drive-off is enabled – even in reverse.

Anti-lock braking system (ABS):

Now somewhat of a classic among electronic control systems, this system prevents the wheels from blocking during emergency braking and, in this way, keeps the vehicle steerable. Familiar, light pulsation at the brake pedal can be detected during ABS intervention.

Electronic brake pressure distribution (EBD):
This system apportions the brake force optimally to both axles depending on the situation. In this way, the greatest possible braking force is achieved and, at the same time, the vehicle is prevented from breaking out through "overbraking" at the rear.

Good view behind:
The large, heated exterior mirrors are positioned optimally and can be adjusted comfortably by electrical means from the driver's seat. Thanks to the wide angle mirrors on both sides there is no blind spot next to the vehicle.

Safety on the road:
Four seats complete with 3-point seatbelts in the direction of travel ensure the utmost safety whilst travelling. Statistically, the 3-point seatbelt saves a human life every seven seconds.

Secure cab:
The driver's door can be locked and unlocked conveniently at the press of a button via the central locking in the centre console of the instrument panel. In this way, unauthorised access into the cab is prevented when the motorhome is parked up.

Good visibility in any weather:
The reliable 2-blade windscreen washer system at the front assures a maximum field of view thanks to its large radius. This means that

the whole road surface is clear to see, even in a heavy downpour – a bonus in terms of safety.

Hymer Compact – Highlights from series production

Traditionally one step ahead

A slim shape but lavish when it comes to the equipment: the Hymer Compact offers you a number a sophisticated characteristics as standard. As a result, you can enjoy first-class driving and living comfort.

Perfect heat insulation:
The Styrofoam sandwich bodywork complete with XPS core and premium aluminium external wall ensures excellent insulation and cosy room temperature inside the vehicle.

Permanent protection from underneath:
With its indestructible GFK underbody, the vehicles are practically immune from weather-related damage. Even stone-chips, grit and dirt are kept at bay by the underbody – a secure foundation for the entire service life of the motorhome.

Solid bodywork:
Attractive and practical GRP rear with large boot flap as standard.

Harmonious external design:
The painted spoiler rounds off the external design of the Compact and gives the vehicle a particularly harmonic overall appearance.

Comfortable loading:
The wide boot flap not only facilitates the loading of the vehicle with all types of leisure items, it also serves as weather protection during a break and can also be opened and closed quickly thanks to a stable strap.

Safely secured in place:
With a total of four adjustable lashing eyelets and associated rails, all types of luggage can be securely fastened. As a result, everything remains in place, even on longer journeys.

Hymer Compact – Highlights from series production

More independence when travelling:
The large water tanks increase the range to the next filling station and thereby facilitate more freedom and spontaneity. The fresh water tank in the double floor has a capacity of 100 litres, the grey water tank holds 90 litres.

Helpful exterior light:
The powerful LED awning light with rainwater deflector is already part of the standard equipment. It illuminates a wide area outside the entry door, thereby making it safe to alight the vehicle in the dark.

Easy entry:
The electrical step located at the entrance to the living area enables a comfortable entrance into and exit from the vehicle.

Light and friendly:
Both of the standard pivoted windows located in the rear area possess a blackout and mosquito screen and ensure a light and friendly atmosphere to live in.

Guard against dirt:
All wheels of the rear axle are equipped with large mudguards. They prevent dirt or snow coming into contact with components close to the ground, such as the grey water drainage pipe or exhaust system, and adhering to these areas.

Light and airy in the cab:
The large, tilting panoramic roof above the cab seats provides more light in the living space. For the required level of privacy and sunlight protection, a blackout blind is fitted.

Excellent ventilation, great protection:
The two roof vents located above the rear bed and the living space ensure privacy and permit the quick extraction of moisture. Fly and blackout screens are integrated in the flat frame.

Comfortable all-rounder:
The swivel and height adjustable lounge seats in the cab are covered completely in the same fabric as the living space. With a high level of seating comfort and large, adjustable arm rests, they can be as inviting for a relaxed drive as a pleasant evening in front of the television.

The highest level of sleeping comfort and a healthy sleep:
All of the beds are equipped with high quality multi-zone cold foam mattresses that support each area of the body accordingly. Breathable mattress toppers in the rear assure good ventilation.

Hymer Compact – Highlights from series production

For drying, airing and storage:
The sturdy, fold-out clothes rail in the shower is ideal for drying wet clothing without taking up too much space. If required, it can also be used as additional storage space for holiday attire – or simply for airing clothes.

Details make the difference:
In addition to the clothes rail in the shower, two fold-out hooks offer further space for wet clothing or towels.

High heating power included:
With 4000 watts of power, the Truma Combi 4 heater, installed as standard, has no trouble bringing the temperature inside the vehicle up to a cosy level even when it is freezing outside. Thanks to its central location under the seating group, the heat is distributed optimally throughout the vehicle.

Additional heat in the driver's cabin:
Heating outlets are located underneath the driver's cabin seats that ensure that the driver's cabin is ideally heated, even when stationary and the vehicle is being used solely for accommodation.

Easily accessible drain valves:
The whole supply installation system is designed so that all units are protected in the best way but still have easy access.

Light for indoors and outdoors:
The clothing cupboard light in the Hymer Compact helps you to find what you are looking for straightaway. It can also be easily removed and used outside as a torch when it is dark.

Prepared for radio and TV:
Loudspeakers in the sleeping area and living space, wiring and a socket and also a radio aerial are factory fitted items in every vehicle. All that is needed is for a radio and/or television to be plugged in.

Flexible TV bracket:
The TV bracket can be individually rotated and, as a result, offers the possibility to simply adjust it to your desired TV position.

Vehicle services at a glance:
The fresh water and grey water levels, the battery voltage, the load at the 230 V sockets and additional data readings can be taken from the well laid out control panel above the entry door. This means that the current service levels are always in check.

Hymer Compact – Highlights from series production

Safe power supply:
The high-performance 90 Ah living space battery is safely located in a large battery compartment with space for up to 2 living space batteries.

Travelling self-sufficiently:
There is space for up to 2 x 11 kg gas cylinders in the Hymer Compact in order to be able to remain self-sufficient for as long as possible.

Plenty of sockets for appliances:
With three 230 volt and two 12 volt sockets, there are numerous means of connection. In the seating group, washroom and kitchen, 230 volt appliances can be connected, while 12 volt devices can be connected at the TV point and in the instrument panel.

Hymer Compact – Interior design

As individual as you are

Simply combine the standard "Trentino Pear Wood" furniture finish with one of four premium fabric designs. As a result, you are able to give your Hymer Compact the ambience and the style that you desire.

"Charbonnel" fabric design
(material: textile)

"Castello" fabric design
(material: textile)

"Kalmar" fabric design
(material: textile)

"Barodino" fabric design
(material: textile)

"When hoping to achieve a timeless, cosy ambience, it is important to ensure that colours and materials harmonise well, especially when it comes to compact layouts."
Frank Venter, Head of Design

Compact 404  3.300 kg [3.500 kg]   []
