He has been with the company since 1989.

HYMER Motorhomes

Always an original

For generations of holidaymakers, HYMER is the epitome of holidaying on wheels. And there is a good reason for this: Since the invention of the motorhome by Erwin Hymer in 1961, our vehicles have set standards and affect developments in this area of industry. Whatever class you are searching in: at HYMER you will always find the original.

We use this edge to offer you more – more choice, more comfort, more safety. Anyone who has been on the road in a HYMER motorhome will appreciate the difference. The thing that makes travelling a unique adventure here is the diversity of high quality details. And more than 50 years of experience that we draw upon to bring these details for you into perfect harmony.

You can gain a particularly good impression of this from the **new model year**. In the second half of this brochure you can find a detailed overview of the main equipment features, accompanied in each case by images and an explanation. This way, you can get to know the model series of your choice even better.

Of course, a description is no substitute for first-hand experience of the original. You should therefore take advantage of the opportunity at your HYMER trading partner to carefully look

around your dream vehicle and, better still, take it for a test drive. Our close-knit dealer and service network in Germany and Europe provides you with the assurance that there is always first-class support nearby.

A general overview of the HYMER model series can be seen on the next double page. Here, you can compare the

“For us, the name HYMER is a bond. And for our customers a promise. These motorhomes offer the best performance and the best quality in any vehicle category.”

basic features of our motorhomes easily and conveniently – as an initial orientation aid to determine which vehicles best match your individual requirements. Further information about all available floor layouts and equipment versions can be obtained as always

from your HYMER trading partner or www.hymer.com. You can also order the latest catalogues from there for all of the models.

If, in addition, you are among the growing number of Facebook users, we would be delighted to hear about your journeys and experiences at www.facebook.com/hymerAG. Many of

our customers contribute to this site on a regular basis and make it a lively and informative place to visit. You can find valuable tips covering the whole spectrum of holidaying on wheels with the original. Experience them yourself: the mobile homes from HYMER.

HYMER Compact

In a manner of speaking, being mobile and free is the original need that helped to create camping. The new Compact from HYMER combines the advantages of the panel van extended into a motorhome with the comfort and the generosity of a semi-integrated motorhome in order to fulfil your desire for independence.

People who favour equipped panel vans generally prefer the excellent vehicle manoeuvrability compared to larger motorhomes. As an owner, you have versatility and the ability to decide what you want to tackle next on a moment's notice due to the van's usefulness as both a motorhome and a means of transportation. The van has just one drawback: It is not a motorhome; it is an equipped van, which is why it lacks a few features that make semi-integrated motorhomes so comfortable and convenient – such as a home-like feeling and better insulation.

As a true HYMER, the new Compact gives you precisely that: You will be driving a semi-integrated with an insulated design and a GRP rear end, meaning you do not lose anything that makes a panel van so practical – from the large tailgate to the overall length ideal for city driving.

The unique feeling of spaciousness distinguishes the HYMER Compact from equipped vans. Unlike vans, it provides more room for living and storage. Ample headroom above the front seats captivates you during the

“It was quite a challenge to accommodate the typical HYMER comfort and the sophisticated equipment into such a compact space.

However, the concept is right and will help many panel van fans to enjoy a little bit more luxury when travelling.”

Melanie Rothacher, Product Management

first look at the interior. The cabin section placed over the panel van provides convenient standing height, where the front seats already form part of the overall living space. The larger storage cabinets above the kitchen and seating group showcase another advantage of the design, built as a motorhome

from the ground up. The Compact 408 and 478 offer a spacious drop-down bed with full-size sleeping area for two people. In the Compact 478, the seating group in the rear can also be converted into a double bed. A tall

wardrobe with bottom compartments allows you to stow your clothing with greater care than in a half-height wardrobe.

Additional space in the bathroom and kitchen provides another bonus benefit to comfort from the design of

the HYMER Compact. The comparatively spacious compact bathroom offers a bit more freedom of movement for taking care of personal hygiene than is typical for panel vans. The kitchen boasts a large sink instead of just a combination hob/sink with fold-down faucet. A 104-litre refrig-

erator with large freezer also comes standard in the HYMER Compact.

Convenience is what distinguishes the Compact, also in relation to the seating group, from the equipment in a panel van that is usually kept to a minimum. The small HYMER also integrates the

passenger seat into the group thanks to a fixed table with integrated rotating table top; cosy stability replaces the makeshift feel of a fold-down table without a rotating table top. In addition, the highly adjustable front seats are upholstered in the same material as the living area, resulting in a look that

Ingenious combinations like the large tailgate of GRP make the HYMER Compact a true multi-tasker able to handle everyday activities and tasks on holiday thanks to enormous stowage spaces.

HYMER Compact

naturally integrates into the standard sophisticated overall design instead of looking like out-of-place special additions.

New perspectives emerge from the panorama ceiling over the cabin of the HYMER Compact. Two windows in the rear left and right let plenty of light into the multi-functional motorhome and a normal fold-out door with electrical step enables convenient access without the loud noise from opening and closing an unwieldy sliding door. The sandwich construction with Styrofoam insulation and GRP sandwich flooring and GRP roof provide heat and a cosy feeling on frosty days—showing the Compact's much-improved insulation characteristics in heat and cold compared to a panel van made of sheet metal.

More practical features like a gas locker for 2x11 kg gas cylinders and TV and radio-ready setup that comes standard showcase the thoroughness of the HYMER Compact design. This is why the interior has been laid out almost

exclusively using an energy-saving LED design and features plenty of outlets for devices that use either 3x230 volts or 2x12 volts. The striking GRP boot, the large tailgate for convenient rear loading and the painted front spoiler even give the Compact a co-ordinated appearance on the outside. The mudflaps on the rear axle are atypical for panel vans, but ensure that a clean, co-ordinated look remains after long days of travelling.

In order to ensure top-level safety, the HYMER Compact boasts a multitude of sophisticated features such as standard ESP, ASR, Hill Holder for smooth hill starts, Traction Plus and driver and passenger-side airbags. This also includes outside electric mirrors and 4 seats with belts. In order to ensure suitability for everyday driving, the HYMER Compact retains high driver visibility with its exterior dimensions despite its home-like, upgraded interior. A design width of 2.10 m, a length of 5.99 m and 6.38 m and a height of 2.75 m allow you to roam freely downtown and give you easy mobility at home or on holiday. »

HYMER Compact – Living comfort

01 02

03

Generous living space despite compact external dimensions: Thanks to the driver's cabin section, the HYMER Compact offers more ceiling height and, as a result, also offers a generous living space that extends well into the driver's cabin. Thanks to the rotating seats, it is possible to create a cosy seating area for up to 4 people within a few seconds.

04

05

- 01 The Comfort bench with two individual seats can be easily pushed apart and is optionally available in all Compact models.
- 02 The fold-down stool functions as a leg rest when the passenger seat is turned.
- 03 The ergonomic entrance handle ensures an easy and safe entrance into the vehicle.
- 04 Spacious living area in the Compact 478 in the warm "Trentino pear wood" furniture finish and "Castello" fabric design.
- 05 The passenger's seat is perfectly integrated into the living space thanks to the rotating table top.

HYMER Compact – Sleeping comfort

01

02 03

04

05

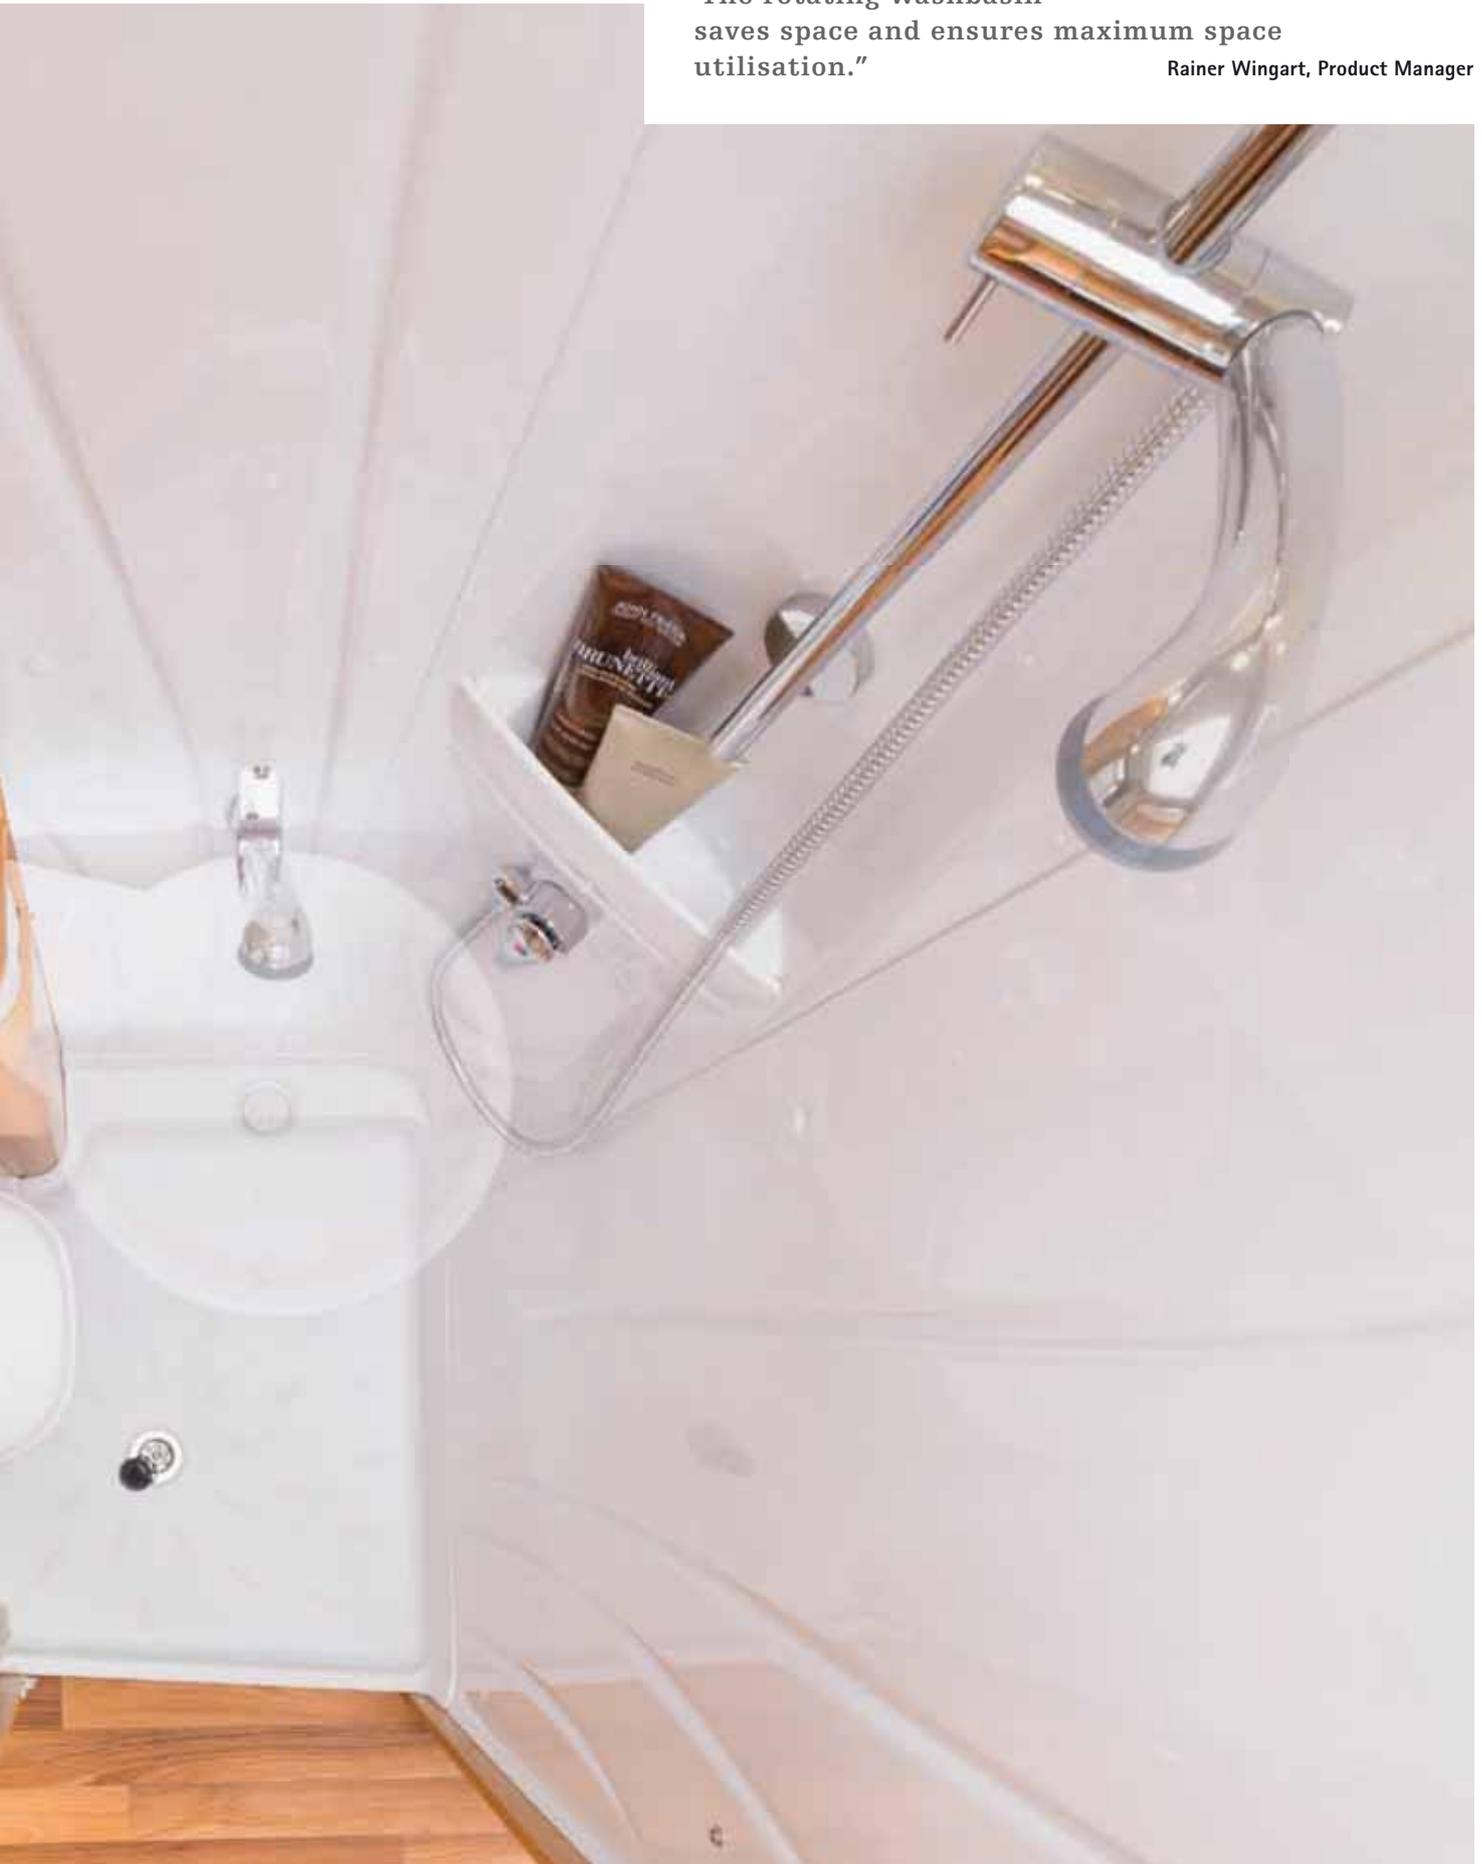

- 01 Rear fold-down bed with generous reclining area.
- 02 Pull-out step for safe and easy access to lowered fold-down bed.
- 03 Easy loading and unloading is also ensured when the fold-down bed is lowered.
- 04 The rear seating group converted onto a double bed in the Compact 478 with lowered fold-down bed above.
- 05 Sleeping area in the Compact 474 with single beds and deep overhead stowage cabinets.

HYMER Compact – Washing comfort

**“The rotating washbasin
saves space and ensures maximum space
utilisation.”**

Rainer Wingart, Product Manager

03

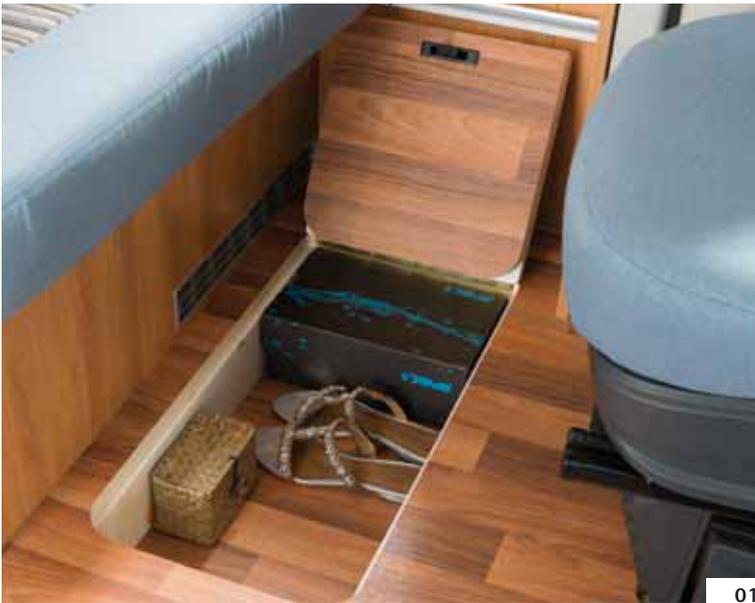

04

- 01 Extra-high tap and large sink ensure the utmost comfort in the kitchen.
- 02 Making cooking fun: the standard 2-flame cooker in the Compact 408.
- 03 There is space for all kitchen utensils in the drawer complete with premium cutlery insert.
- 04 The 104-l refrigerator with separate freezer compartment is already included in all Compact models as standard.
- 05 The kitchen in the "Trentino Pear Wood" furniture finish in the Compact offers sufficient storage space for every long journey.

HYMER Compact – Storage comfort

01 02

04

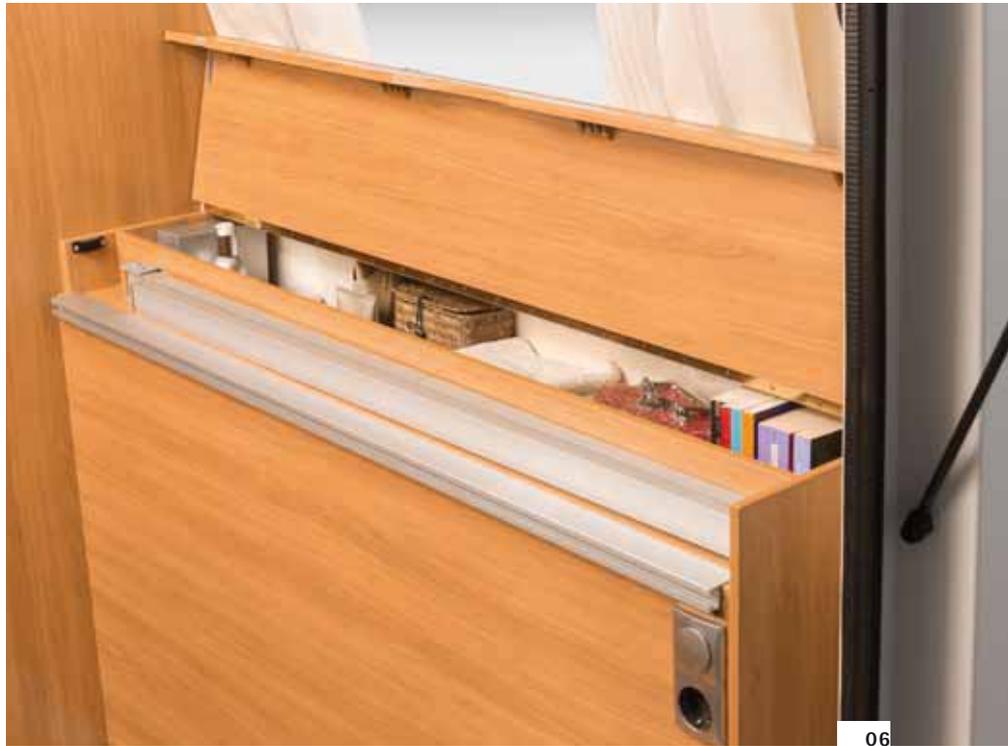

03

Practical solutions combined with maximum stowage room. Typical for the smart HYMER Compact. From room-height wardrobe to an ample number of drawers to the large rear storage flap. Every nook and cranny has been used so that you can have everything on board during the best days of the year.

05

06

- 01 Flexible and useful storage compartment in the base underneath the living room table.
- 02 Practical drawer underneath the bench of the Compact 408.
- 03 Easily accessible wardrobe in the 478 Compact with a width of 37 cm.
- 04 Easily accessible drawers and storage doors in the rear area leave nothing to be desired.
- 05 Room-height wardrobe with standard wardrobe light and pull-out step in the Compact 408.
- 06 The spacious storage chest offers sufficient space and can also be used as practical storage space when the cover is closed.

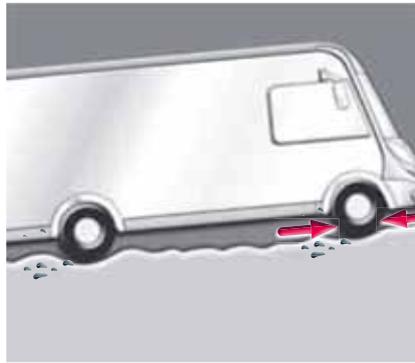

HYMER Compact – Road safety

Everything in view, everything under control

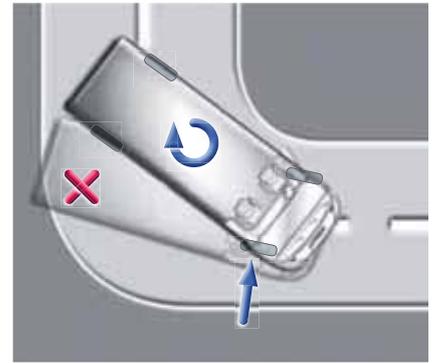

The premium travelling comfort of the HYMER Compact also includes a range of safety equipment that is unrivalled in this class. Thanks to the best possible view in the driver's cabin and electronic safety systems, you will always remain in charge of the situation – even in critical situations.

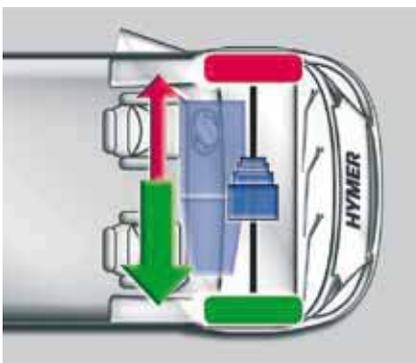

Driver and front passenger airbag:
Both seats in the cab are equipped as standard with Fiat airbags. In the event of an accident they are triggered in a fraction of a second and prevent severe head injuries. If an airbag is triggered, the seat belt is tensioned at the same time.

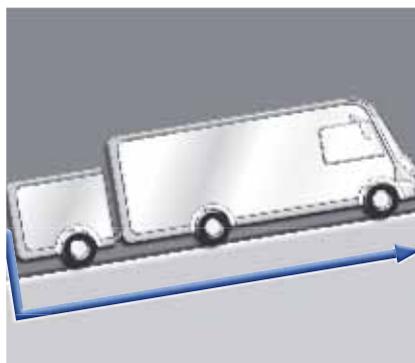

Anti-skid regulation (ASR):
If traction is lost at a wheel (wheel slip), this is detected by the electronics and the wheel is braked automatically. This makes it much easier to drive off and accelerate on slippery surfaces and the vehicle is prevented from sliding sideways at the rear.

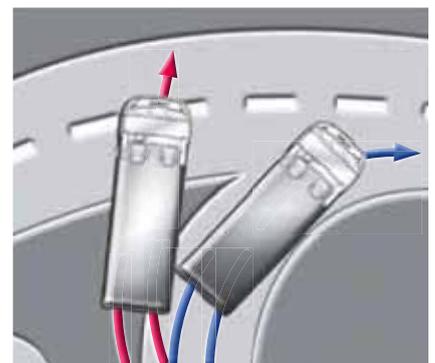

Electronic stability program (ESP):
In critical situations, skidding or breaking out of the vehicle is prevented by engine speed adjustment and by targeted braking of individual wheels. When doing this, "Adaptive ESP" takes account of the respective load status.

Traction Plus:
In conjunction with ESP, this system ensures greater traction on difficult terrain by distributing the torque to the front wheels in a targeted manner. This makes it easier to drive-off on wet grass, for example, or manoeuvre over muddy ground.

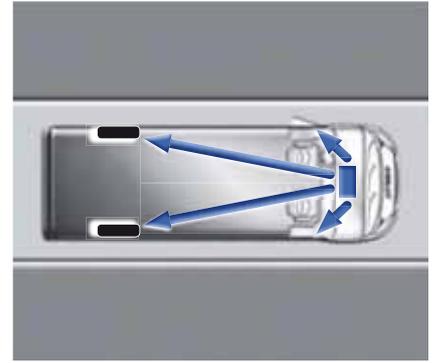

Hill holder:
On gradients of about 5% and steeper, this drive-off assistant maintains the brake pressure briefly after the brake pedal has been released. In this way, rolling back of the vehicle is prevented and comfortable drive-off is enabled – even in reverse.

Anti-lock braking system (ABS):
Now somewhat of a classic among electronic control systems, this system prevents the wheels from blocking during emergency braking and, in this way, keeps the vehicle steerable. Familiar, light pulsation at the brake pedal can be detected during ABS intervention.

HYMER Compact – Road safety

Electronic brake pressure distribution (EBD):
This system apportions the brake force optimally to both axles depending on the situation. In this way, the greatest possible braking force is achieved and, at the same time, the vehicle is prevented from breaking out through "overbraking" at the rear.

Good view behind:
The large, heated exterior mirrors are positioned optimally and can be adjusted comfortably by electrical means from the driver's seat. Thanks to the wide angle mirrors on both sides there is no blind spot next to the vehicle.

Safety on the road:
Four seats complete with 3-point seatbelts in the direction of travel ensure the utmost safety whilst travelling. Statistically, the 3-point seatbelt saves a human life every seven seconds.

Secure cab:
The driver's door can be locked and unlocked conveniently at the press of a button via the central locking in the centre console of the instrument panel. In this way, unauthorised access into the cab is prevented when the motorhome is parked up.

Daytime running lights as standard:
Seeing and being seen is important in equal amounts when travelling by road. The daytime running lights are a standard feature at HYMER. For unimpeded travel in countries where day driving lights are already compulsory.

Good visibility in any weather:
The reliable 2-blade windscreen washer system at the front assures a maximum field of view thanks to its large radius. This means that

the whole road surface is clear to see, even in a heavy downpour – a bonus in terms of safety.

HYMER Compact – Highlights from series production

Traditionally one step ahead

A slim shape but lavish when it comes to the equipment: the HYMER Compact offers you a number a sophisticated characteristics as standard. As a result, you can enjoy first-class driving and living comfort.

Perfect heat insulation:
The Styrofoam sandwich bodywork complete with XPS core and premium aluminium external wall ensures excellent insulation and cosy room temperature inside the vehicle.

Permanent protection from underneath:
With its indestructible GFK underbody, the vehicles are practically immune from weather-related damage. Even stone-chips, grit and dirt are kept at bay by the underbody – a secure foundation for the entire service life of the motorhome.

Highest level of leak-tightness:
The vehicle roof is made from sturdy aluminium and has no longitudinal seams through which water could ingress from above. As additional protection against weather and hailstones, a GFK coating serves to prevent mechanical damage to the surface of the roof.

Solid bodywork:
Attractive and practical GRP rear with large boot flap as standard.

Harmonious external design:
The painted spoiler rounds off the external design of the Compact and gives the vehicle a particularly harmonic overall appearance.

Comfortable loading:
The wide boot flap not only facilitates the loading of the vehicle with all types of leisure items, it also serves as weather protection during a break and can also be opened and closed quickly thanks to a stable strap.

HYMER Compact – Highlights from series production

More independence when travelling:
The large water tanks increase the range to the next filling station and thereby facilitate more freedom and spontaneity. The fresh water tank in the double floor has a capacity of 100 litres, the grey water tank holds 90 litres.

Useful outdoor light:
Standard equipment also includes the high-power LED awning light. It lights up the space around the entrance door outside of the motorhome, allowing you to enter with ease in the dark.

Easy entry:
The electrical step located at the entrance to the living area enables a comfortable entrance into and exit from the vehicle.

Light and friendly:
Both of the standard pivoted windows located in the rear area possess a blackout and mosquito screen and ensure a light and friendly atmosphere to live in.

Guard against dirt:
All wheels of the rear axle are equipped with large mudguards. They prevent dirt or snow coming into contact with components close to the ground, such as the grey water drainage pipe or exhaust system, and adhering to these areas.

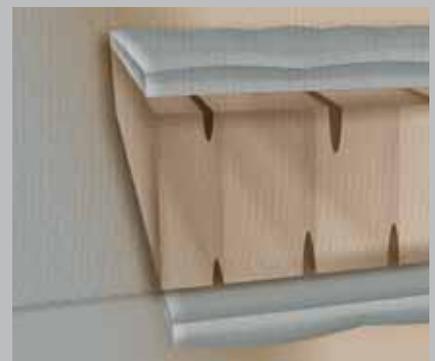

Light and airy in the cab:
The large, tilting panoramic roof above the cab seats provides more light in the living space. For the required level of privacy and sunlight protection, a blackout blind is fitted.

Excellent ventilation, great protection:
The two roof vents located above the rear bed and the living space ensure privacy and permit the quick extraction of moisture. Fly and blackout screens are integrated in the flat frame.

Comfortable all-rounder:
The swivel and height adjustable lounge seats in the cab are covered completely in the same fabric as the living space. With a high level of seating comfort and large, adjustable arm rests, they can be as inviting for a relaxed drive as a pleasant evening in front of the television.

The highest level of sleeping comfort and a healthy sleep:
All of the beds are equipped with high quality multi-zone cold foam mattresses that support each area of the body accordingly. Breathable mattress toppers in the rear assure good ventilation.

HYMER Compact – Highlights from series production

Details make the difference:
In addition to the clothes rail in the shower, two fold-out hooks offer further space for wet clothing or towels.

High heating power included:
With 4000 watts of power, the Truma Combi 4 heater, installed as standard, has no trouble bringing the temperature inside the vehicle up to a cosy level even when it is freezing outside. Thanks to its central location under the seating group, the heat is distributed optimally throughout the vehicle.

Additional heat in the driver's cabin:
Heating outlets are located underneath the driver's cabin seats that ensure that the driver's cabin is ideally heated, even when stationary and the vehicle is being used solely for accommodation.

Easily accessible drain valves:
The whole supply installation system is designed so that all units are protected in the best way but still have easy access.

Light for indoors and outdoors:
The clothing cupboard light in the HYMER Compact helps you to find what you are looking for straightaway. It can also be easily removed and used outside as a torch when it is dark.

Prepared for radio and TV:
Loudspeakers in the sleeping area and living space, wiring and a socket and also a radio aerial are factory fitted items in every vehicle. All that is needed is for a radio and/or television to be plugged in.

Flexible TV bracket:
The TV bracket can be individually rotated and, as a result, offers the possibility to simply adjust it to your desired TV position.

Vehicle services at a glance:
The fresh water and grey water levels, the battery voltage, the load at the 230 V sockets and additional data readings can be taken from the well laid out control panel above the entry door. This means that the current service levels are always in check.

Safe power supply:
The high-performance 90 Ah living space battery is safely located in a large battery compartment with space for up to 2 living space batteries.

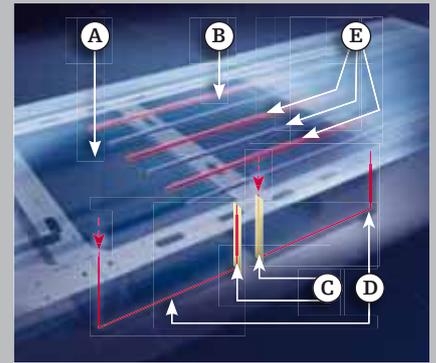

HYMER Compact – Highlights from series production

Travelling self-sufficiently:
There is space for up to 2 x 11 kg gas cylinders in the HYMER Compact in order to be able to remain self-sufficient for as long as possible.

Plenty of sockets for appliances:
With three 230 volt and two 12 volt sockets, there are numerous means of connection. In the seating group, washroom and kitchen, 230 volt appliances can be connected, while 12 volt devices can be connected at the TV point and in the instrument panel.

Insulated and heated underbody:
The floor conceals the fresh water (A) and grey water tank (B) in insulated trays (C), which have hot air flowing through them (D). All of the installations (E) are in a heated area of the living space, protected against frost.

Safely secured in place:
With a total of four adjustable lashing eyelets and associated rails, all types of luggage can be securely fastened. As a result, everything remains in place, even on longer journeys.

HYMER Compact – Interior design

As individual as you are

Simply combine the standard "Trentino Pear Wood" furniture finish with one of four premium fabric designs. As a result, you are able to give your HYMER Compact the ambience and the style that you desire.
